

Twarakesan Kumar

Enthusiastic and results-driven Artificial Intelligence and Data Science graduate with a hand on experience in machine learning, deep learning, data analytics, and software development. Experienced in designing and developing innovative solutions through academic projects involving AI-driven healthcare systems, IoT applications, computer vision, and intelligent automation. Proficient in Python, SQL, TensorFlow, Scikit-learn, and modern web technologies, with a passion for leveraging data and emerging technologies to solve real-world problems. A quick learner with strong analytical, communication, and teamwork skills, seeking opportunities to contribute to impactful projects while continuously enhancing technical expertise in a dynamic and growth-oriented environment.

Address :

Chennai, Tamil Nadu, India

Skills

Devops Tools

GitHub, VS Code

Cloud Servers

AWS, Firebase

Script Libraries

Bootstrap, Pandas, Numpy, Matplotlib

Languages/Scripts

Python, JavaScript, Css , HTML

AI/ML

Machine Learning , Deep Learning , Natural Language Processing (NLP) , TensorFlow

DB Tools

MySQL , Power Bi , Excel , Data Preprocessing

Soft Skills

Teamwork , Problem-Solving , Communication , Critical Thinking

INTERNSHIPS

SystemCares ITSolution – Data Science & Cybersecurity Intern

- Worked with Acronis Cybersecurity & Backup Tool to manage data protection, backup management .
- And disaster recovery solutions. Gained hands-on experience in system security, endpoint protection, and threat mitigation techniques. Applied cybersecurity best practices to ensure data integrity and business continuity.

Credo System– Amazon Web Service Development Internship Program

- Trained and worked on Amazon Web Services (AWS), covering EC2, S3, IAM, and load balancing for cloud infrastructure.
- Acquired practical knowledge in deploying, monitoring, and managing cloud-based applications.

Key Projects

MediTrack – Medicine Reminder Web Application - Developed a React.js web application with Firebase backend and authentication to manage and schedule medicine reminders for patients.

Sign Language to Text Conversion- Designed a Python-based application leveraging OpenCV, MediaPipe, and TensorFlow to recognize sign language gestures and convert them into real-time text output. Built an AI/ML model for accurate gesture recognition, enabling seamless real-time interaction between hearing-impaired individuals and others.

AI-Driven Medical Support and Assistance System for Rural Areas - Developed an AI-powered healthcare platform that analyzes patient symptoms, recommends suitable doctors, and enables appointment booking through voice and text-based assistance.

Smart Agriculture System - designed to improve farming efficiency through automated monitoring and control. The system uses sensors to measure soil moisture, temperature, and humidity, enabling farmers to make data-driven decisions. It can automatically control irrigation based on soil conditions, reducing water wastage and improving crop yield. By integrating real-time data analysis and remote monitoring, the project helps promote sustainable and productive agricultural practices.

Academic History

Undergraduate B.tech|Artificial intelligence&Data science : 78.3%

Agni college of technology | 2026

SSLC | Percentage : 59%

Kamarajar matriculation higher secondary school | 2020

HSC | Percentage : 64%

Kamarajar matriculation higher secondary school

Specializations

- UI Developer - Infosys academy(ICT)
- International conference on Innovation in computing - Shaping the Digital Future (ICICSDF'25)
- Introduction to cloud computing - Skill up

Languages Spoken

Tamil

Native or Bilingual Proficiency
